SNOWBALL

Unlock CTC Liquidity. Earn Yield. Power Creditcoin DeFi.

Universal Smart Contracts | CDP Stablecoin | Lending | Yield Vaults | AI Agents

$80M+ OF IDLE CTC, ZERO DEFI

CURRENT STATE

- ✗ No native stablecoin
- ✗ No lending markets
- ✗ No yield opportunities
- ✗ No DeFi rails

→

WITH SNOWBALL

- ✓ Mint sbUSD from CTC
- ✓ Yield vaults + lending
- ✓ Keep CTC upside
- ✓ AI agent for beginners

Snowball turns idle CTC into productive capital — first and only DeFi protocol on Creditcoin

WHY SNOWBALL

WHY THIS

$80M+

CTC market cap, $0 DeFi TVL

- No stablecoin or lending
- No yield infrastructure
- Zero DeFi for CTC holders
- Untapped liquidity potential

WHY NOW

100%

Open market, zero competition

- Creditcoin EVM launched
- USC cross-chain enabled
- RWA + staking narrative
- No competitor, winner takes all

WHY US

6

Protocols live on testnet

- DeFi-native operators
- AI agent expertise (ERC-8004)
- Liquity, Morpho, Aave depth
- Full-stack deployed

HOW SNOWBALL WORKS

1. Deposit CTC → 2. Mint sbUSD → 3. Earn Yield → 4. AI Compound

DEFI PLAYGROUND

CDP
Live

CTC → sbUSD stablecoin

Lending
Live

Isolated markets (3 pairs)

DEX
Live

Concentrated liquidity AMM

Yield Vault
Live

Auto-compounding (6 vaults)

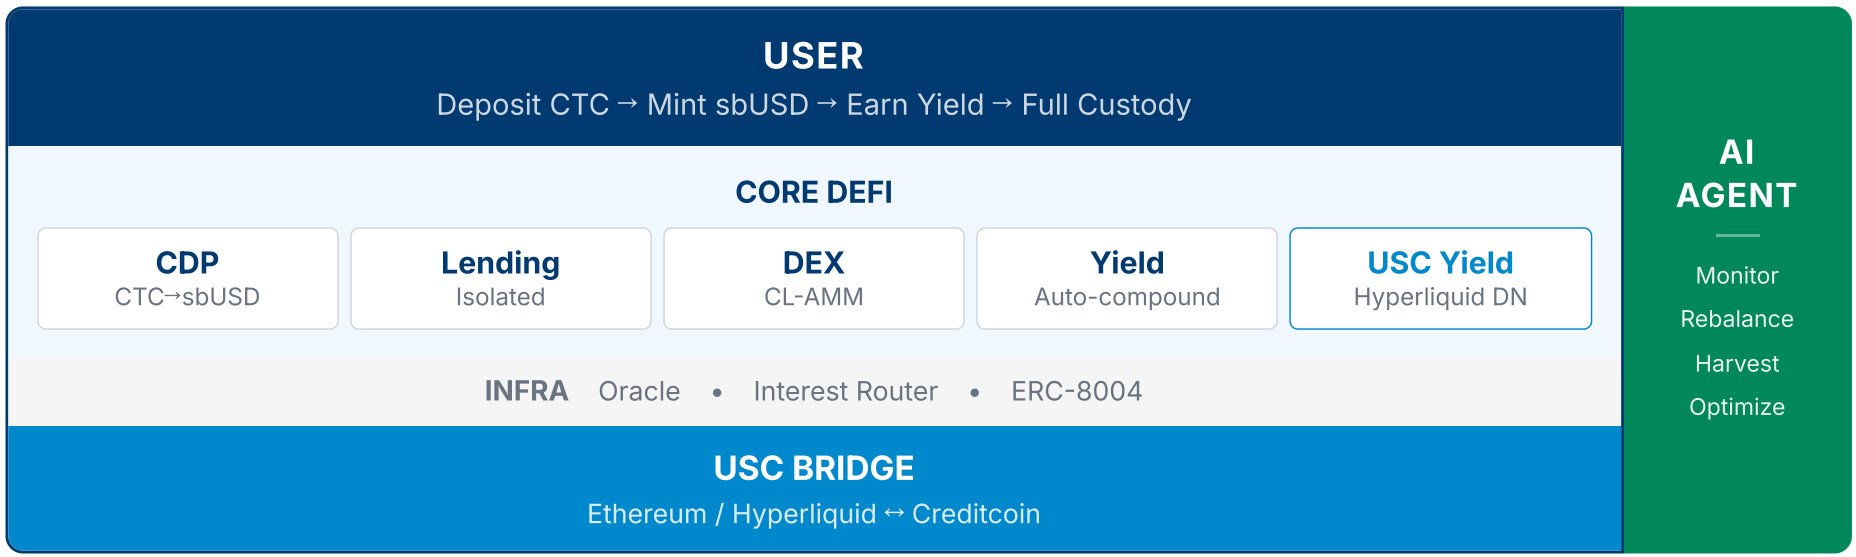
AI Agent
Live

Harvest, rebalance, optimize

USC Bridge
Verified

Cross-chain via USC proof

PROTOCOL ARCHITECTURE



1. Bridge via USC
2. Deposit → Mint → Supply
3. AI auto-compounds
4. Interest recycled, no leaks

COMPETITIVE ADVANTAGE

	Traditional DeFi on New L1s	Snowball
Approach	✗ Single product (DEX or lending)	✓ **Full stack** CDP+Lending+DEX+Yield+AI
Stablecoin	✗ Bridge USDC/USDT	✓ **Native sbUSD** backed by CTC
Capital	✗ Liquidity scattered	✓ **InterestRouter** 100% recycled
Bridge	✗ Third-party (trust assumptions)	✓ **USC** trustless verification
Risk	✗ Manual monitoring	✓ **AI agents** on-chain (ERC-8004)

Only full-stack DeFi protocol on Creditcoin — no competitor, winner takes all

MARKET OPPORTUNITY

MARKET SIZING

Metric	Value
CTC Market Cap	**$80M+**
Current DeFi TVL on Creditcoin	**$0**
Typical DeFi TVL / L1 Market Cap	5–15%
Conservative TVL target (5%)	**$4M+**
Projected annual revenue at 5%	**$200K+**

GROWTH CATALYSTS

Catalyst	Impact
Creditcoin community	holders want DeFi
USC mainnet	multi-chain inflow
RWA narrative	institutional interest
CTC staking	lstCTC demand
Zero competition	first mover

REVENUE MODEL

CDP	Lending	DEX	Yield Vault
Minting & redemption fees	Interest rate spread	Swap fees (0.3%)	Performance fee (10%)

TAM = entire Creditcoin DeFi market — zero competitors, 100% capture opportunity

ROADMAP

Phase	Deliverables
Phase 0: Foundation	CDP, Lending, DEX, Oracle, InterestRouter, testnet deploy
Phase 1: Yield Infra	Yield Vaults, AI Keeper, leverage loop, USC bridge
Phase 2: Security + Mainnet	Security audit, mainnet deploy, SNOW token, buyback & burn
Phase 3: AI + Governance	AgentVault, ERC-8004 marketplace, on-chain governance
Phase 4: USC Expansion	Multi-chain USC, credit scoring, RWA data integration

Phase 0–1 complete — full protocol live on testnet, ready for mainnet
